

# Peek at our WEEK

## HIGHLIGHTS

This week in Science we explored how water and nutrients moved through a plant (ask about our celery experiment). We also experimented with plant needs. We planted 2 plants-only one was placed in sunlight. We are recording our findings. Finally, we are further investigating how each part helps the plant survive.

In Reading, we read a variety of nonfiction and fiction books focusing on plants and biomes. We worked on asking and answering questions.

In Writing, we completed our informative pieces comparing and contrasting the information we gathered from 2 different texts about plants.

In Math, worked on solving word problems involving money and assessed our skills in this area. We began our study of clocks and telling time.
